

# !important tips\_ the first issue

Generated by Parcel • February 23, 2022 at 1:38pm

[View live preview](#)

This is the first of Parcel's weekly newsletter, !important tips, Each week will feature a different tool, tip, etc from other email geeks in the community.

FROM: Avi from Parcel <avi@useparcel.com>  
SUBJECT: !important tips: the first issue  
PREVIEW: Avoid the pitfalls of copy and paste with this one trick

## !important tips

curated by your friends at  Parcel

This is the first issue of a weekly newsletter featuring email tips, tools, and snippets. You're getting this because you opted in to emails from Parcel.

If you don't want this newsletter, we totally get it! [Opt-out of !important tips](#)

For this first issue, we're looking at the online tool [What Does It Paste?](#) from our friends over at Taxi for Email.

Copying and pasting in theory is great (what a sweet time saver the invention), but did you know that the simple act often comes with adding unwanted code to your emails?

This online tool let's you see...what you're actually pasting (man, writing a good email is hard). It's the best way out there to avoid adding unwanted code to your emails especially since you didn't even realize was there!

Seriously a life saver.

[See what you actually copied](#)

Until next week,  
Avi

P.S. [Did you make something cool?](#)  
[Reply with it!!](#)

I get too much email, [unsubscribe from all Parcel emails](#) plz
